

Sog White Paper V0.1.0

Sog(SuperDog) is a memecoin, a cryptocurrency, and will also be a decentralized Layer 1 (L1) blockchain in the future. The current version of Sog is 0.1.0.

Roadmap:

Sog0.1(SPL Token)->Sog0.x(SPL, ERC20, BEP20, etc.)->Sog1.0(DPoS, High TPS:5000~100000)

Sog1.0 will be compatible with Solana VM and Ethereum/BNBChain VM.

Sog1.0 will support Rust as the contract programming language.

Sog1.0 will support Solidity as the contract programming language.

Sog1.0 Main Programming Language: Rust

Auxiliary Programming Languages: Assembly language, C++20, Javascript, python, etc.

Sog SPL Token Address: 7Tc9U8V5CGhC8EGQjAwV1jgMqQbNQ6q6PRR6Y1NipBgX

Fixed Supply: 210,000,000,000

Token Name: SuperDog

Token Symbol: Sog

Token Decimals: 6

Allocation:

\$Sog Airdrops: 55,000,000,000

Liquidity Pools: 54,000,000,000

Sog Development Team: 1,000,000,000

Sog1.0(DPoS, Burn2Mine): 100,000,000,000

\$Sog Airdrops: 04-10-2024 00:00:00(UTC+00) ~ 04-30-2024 00:00:00(UTC+00)

Listed on DEX: 05-01-2024 00:00:00(UTC+00) ~ 05-03-2024 00:00:00(UTC+00)

Send 2 SOL to the official address to participate in the Airdrop(repeatable):

5PsskfVb9W7mYzBGaTbth97ed5hMgYS9hGuooSyTNAuW

If your wallet address has passed KYC verification and successfully sent no less than 2 SOL, it will receive the \$Sog Airdrops(2SOL:10,000,000) within 24 hours.

Additional:

Wallets that have successfully participated in the Airdrop will receive randomly additional \$Sog Airdrops everyday, ranging from 5 to 50,000.

The total amount of \$Sog you will receive during the entire airdrop period is:

$$N * 5,000,000 + N/2 * (5 \sim 50,000) * M$$

(N = amount of SOL sent, N >= 2; M = amount of days from now to due date.)

All SOL received will primarily be used to create liquidity pools in the near future. They are not used to purchase \$Sog in a pre-sale form.

85%: Liquidity Pools (42.5% SOL, 42.5% USDT/USDC)

15%: Development Funds for Sog0.1(Token) to Sog1.0(DPoS).

Twitter: @sog_im

Website: https://sog.im

DEX: coming soon(Jupiter?Raydium?Orca?...)

CEX: coming soon

The Sog development team has more than a dozen developers from all over the world with rich Web3 and Rust development experience. These developers will work together to complete the development of Sog0.1 to Sog1.0. Sog will be managed by SogDAO through SIPs in the near future.
